
Comparing Linear And Exponential Functions

4.4 comparing linear and nonlinear functions - login page - section 4.4 comparing linear and nonlinear functions 169 work with a partner. the table shows the height h (in feet) of a falling object at t seconds. graph the data in the table. decide whether the graph is linear or nonlinear. compare the two falling objects. which one has an increasing speed? a. falling parachute jumper b. falling bowling ball

6.4 comparing linear and nonlinear functions - section 6.4 comparing linear and nonlinear functions 271 the vertices of a figure are given. draw the figure and its image after a dilation with the given scale factor identify the type of dilation.

lesson 7: comparing linear functions and graphs - lesson 7: comparing linear functions and graphs student outcomes students compare the properties of two functions that are represented in different ways via tables, graphs, equations, or written descriptions. students use rate of change to compare linear functions.

lesson notes **lesson 21: comparing linear and exponential models again** - lesson 21: comparing linear and exponential models again student outcomes students create models and understand the differences between linear and exponential models that are represented in different ways. lesson notes students have spent several lessons in this module studying linear and exponential functions. this lesson has students

comparing linear, quadratic, and exponential worksheet - comparing linear, quadratic, and exponential worksheet identify the following as increasing linear, decreasing linear, positive quadratic, negative quadratic, exponential growth, or exponential decay.

comparing linear, quadratic, and exponential models ... - comparing linear, quadratic, and exponential models graphically (learning task) mathematical goals:

- compare and contrast linear, quadratic, and exponential functions.
- recognize the differences between the graphs of linear, quadratic, and exponential functions.

essential questions: **comparing lines and linear equations - gamma** - teacher guide comparing lines and linear equations t-1 comparing lines and linear equations mathematical goals this lesson unit is intended to help you assess how well students are able to:

- interpret speed as the slope of a linear graph.
- translate between the equation of a line and its graphical representation.

comparing properties of two functions matching worksheet - comparing properties of two functions - matching worksheet write the letter of the answer that matches the problem. ____ 1. compare the following functions to determine which has the greater rate of change. function 1: $y = 3x + 4$ function 2: $y = 5x + 7$ a. light bulbs ____ 2. compare the two linear functions listed below and determine which ...
