**25 continuous-time markov chains - introduction** - continuous-time markov chain is defined in the text (which we will also look at), but the above description is equivalent to saying the process is a time-homogeneous, continuous-time markov chain, and it is a more revealing and useful way to think about such a process than **5. continuous-time markov chains - statistics** - 5. continuous-time markov chains • many processes one may wish to model occur in continuous time (e.g. disease transmission events, cell phone calls, mechanical component **chapter 6 continuous time markov chains - biu** - chapter 6 continuous time markov chains in chapter 3, we considered stochastic processes that were discrete in both time and space, and that satisfied the markov property: the behavior of the future of the process only depends upon the current state and not any of the rest of the past. here **1 ieor 6711: continuous-time markov chains** - 1 ieor 6711: continuous-time markov chains a markov chain in discrete time,  $X_n$ , remains in any state for exactly one unit of time before making a transition (change of state). we proceed now to relax this restriction by allowing a chain to spend a continuous amount of time in any state, but in such a way as to retain the markov property. **continuous time markov processes: an introduction - ucla** - in nitesimally in time, and then prove under appropriate conditions that this description leads to a well defined process for all time. we begin with an introduction to brownian motion, which is certainly the most important continuous time stochastic process. it is a special case of many of the types listed above { it is markov, gaussian, a di ... **a minimal continuous-time markov pharmacometric model** - standard continuous-time markov model (ctmm) for analyzing ordered categorical data with markov properties is presented: the minimal ctmm (mctmm). through a ctmm reparameterization and under the assumption that the transition rate between two consecutive states is independent on the state, the markov property is expressed through a single ... **1 continuous time processes - stanford university** - 1 continuous time processes 1.1 continuous time markov chains let  $X_t$  be a family of random variables, parametrized by  $t \in [0, \infty)$ , with values in a discrete set  $S$  (e.g.,  $Z$ ). to extend the notion of markov chain to
